FROM : Dr. Roy Cohn

SUBJECT: Discussion of some problems in homotransplantation

Dear Josh:

The Pacific Coast Surgical Association has accepted my brief paper on a case of successful autotransplantation of the kidney in 47 year old identical twins. There are a few points about the carpentry of interest to surgeons which I will discuss taking not more than ten minutes. I would appreciate it if you could discuss some of the biological problems which have to be solved before successful homotransplantation can take place.

The meeting is in San Francisco, Feb. 19-22, 1961. I do not know the exact date and time for the paper. The program committee would only allow ten minutes. If you feel that it isn't worth your time, I should thoroughly understand but I must submit a name for the discussant before November 1.

Sincerely,
